Circular Economy Action Plan

For a cleaner and more competitive Europe

Ms Emmanuelle Maire
Head of Unit
Unit Sustainable Production, Products & Consumption
DG Environment
European Green Deal

Transforming the EU’s economy for a sustainable future

- Mobilising industry for a clean and circular economy
- Increasing the EU’s Climate ambition for 2030 and 2050
- Supplying clean, affordable and secure energy
- Financing the transition

Leave no one behind (Just Transition)

- A European Climate Pact
- The EU as a global leader

Mobilising research and fostering innovation
- A zero pollution ambition for a toxic-free environment
- Preserving and restoring ecosystems and biodiversity
- From ‘Farm to Fork’: a fair, healthy and environmentally friendly food system
- Accelerating the shift to sustainable and smart mobility
35 actions along the entire life cycle of products, to:

- Make **sustainable products** the norm in the EU
- **Empower** consumers and public buyers
- Focus also on key product value chains: electronics and ICT; batteries and vehicles; packaging; plastics; textiles; construction and buildings; food; water and nutrients
- Ensure **less waste**
- Make circularity work for **people, regions** and **cities**
- **Lead global efforts** on circular economy
Towards a Sustainable Product Policy Framework

• Many **products** break down too quickly, cannot be easily reused, repaired or recycled, and many are made for single use only.

• **Consumers** do not repair products, find too many labels and green claims.

• **Production processes** in Europe are not resource efficient and can pollute our air, water and soil.

A new **overarching framework** addressing all products placed on the EU market, supporting more sustainable patterns of consumption and cutting waste by e.g. promoting better design.
Empowering consumers and public buyers

• Revision of the **consumer law**: consumers to receive trustworthy and relevant information on products at the point of sale

• Establishing a new “**Right to repair**”

• Legislative proposal to ensure companies substantiate their **environmental claims** using Product and Organisation Environmental Footprint methods

• Proposal for **mandatory Green Public Procurement** (GPP) criteria and targets in sectoral legislation

• Phasing-in **mandatory reporting** on GPP
Key product value chains

- Food, water & nutrients
- Construction & buildings
- Textiles
- Plastics
- Electronics and ICT
- Batteries & vehicles
- Packaging

Circular Economy Action Plan
For a cleaner and more competitive Europe
Why local authorities should transition to a circular economy?

- Urban areas are in the best place to reap up the benefits of circular economy, thanks to **high resources, innovation, and human capital**

- **To help MS comply with the European legislation (i.e. waste legislation).** An efficient waste management and recycling system provides a good basis for the circular economy because it allows to recover resources from used items and to re-inject them back in the economy as secondary raw materials.

- To set in place **infrastructures and services for citizens and businesses**, and hence bring environmental benefits and economic opportunities at local level

- **To raise the visibility of the city/region at national and European level** → lead by the example

**Cities are an important feature of the CEAP**
Making circularity work for people, regions and cities

A joint agenda, a transition where no one is left behind

Main actions:

• Revision of the Skills Agenda
• A new Pact for Skills
• Cohesion policy funds (to help regions implement CE strategies & reinforce their industrial fabric)
• Just Transition Mechanism
Urban initiatives in the CEAP

Key assistance to cities:

• European Urban Initiative
• Intelligent Cities Challenge Initiative
• Circular Cities and Regions Initiative

Circular economy is one of the priority areas of the new Green City Accord
**Circular organisations**

<table>

<tbody>
<tr>
<td>Credibility</td>
<td>Verification by an independent and accredited third party</td>
</tr>
<tr>
<td>Transparency</td>
<td>Transparent reporting based on defined indicators</td>
</tr>
</tbody>
</table>
- How does it work?

➢ EIR PEER 2 PEER assistance is provided on request of a Member State public institution involved in the implementation of EU environmental policy and law

➢ Requests can be submitted by national, regional or local public bodies, as well as from regional or local environmental implementation businesses, entrusted with a public task

➢ Requests have to provide information on
  ➢ Applicant, contact person
  ➢ Objective
  ➢ Justification
  ➢ Expertise required
  ➢ Participants and target group
  ➢ Timing

➢ Online-application for requests
  http://ec.europa.eu/environment/eir/p2p_en.htm

➢ National Environment Ministries will be consulted
Stakeholder engagement

• Advancing the circular economy concept on the ground
• Strengthening cooperation among stakeholders' networks

representatives of networks of businesses, civil society and local, regional and national public authorities

Submit your own good practices, knowledge, strategies and voluntary commitments!
