

European Circular Economy Stakeholder Platform

circulareconomy.europa.eu/platform
#CEStakeholderEU

April 2018

Welcome

Dear circular economy community,

Welcome back to the ECESP Highlights, your one-stop shop for circular economy [news and events](#). We would like to thank you for your contributions to the website, which help to promote the circular economy and spread its achievements across Europe and wider.

We remind you that the new version of the website enables you to submit **good practices, circular economy strategies, voluntary commitments, reports and studies** directly via the [Contribute](#) section.

News and events

Final Conference of the Environmental Footprint Pilot Phase, 23-25 April 2018, Brussels

The [conference](#) will take stock of the **Environmental Footprint** journey and explore potential future applications for the Environmental Footprint methods, looking also at the wider circular economy context. You can still register [here](#).

Launch of Austria's Circular Futures Platform, 21 March 2018, Vienna

The recently launched [Plattform Kreislaufwirtschaft Österreich](#) aims to bring together professionals across relevant industries and civil society. The objective of the platform is to establish a solution-oriented multi-stakeholder platform as a think tank, incubator, and catalyst for projects and initiatives necessary for a successful transition to a circular economy in Austria.

Strategies

Circular Flanders, together towards a circular economy

Circular Flanders is the hub and the inspiration for the Flemish circular economy. It is a partnership of governments, companies, civil society, and the knowledge community that will take action together. These organisations are the core of the partnership, and each one has committed to carrying out a specific action which you can find out more about through the [Circular Flanders website](#).

London's Circular Economy Route Map

[The London Circular Economy Route Map](#) outlines a vision of a capital city thriving through the adoption of the principles of circular economy: an economy which keeps products, components and materials at their highest use and value at all times.
