- Transition to a circular economy is essential step in achieving more sustainable and more robust European economy.
- Benefits of industrial symbiosis can be felt at all levels of sustainability.
- The European Economic and Social Committee (EESC) acts as a driver for circular economy and industrial symbiosis through:
 - its Opinions – example: Circular Public Procurement
 - mobilising and empowering civil society networks
 - its joint initiative with the European Commission – the European Circular Economy Stakeholder Platform (ECESP)
- ECESP is a knowledge-gathering hub, one-stop-shop, a place for dialogue and a bridge between existing initiatives, contributing to disseminating the concept of the circular economy at national, regional and local level.

Description:

CEnTOUR – CIRCULAR ECONOMY IN TOURISM is a three-year European project funded by COSME (deadline: September 2023). It is a strategic opportunity to develop and test innovative ideas to support small and medium-sized enterprises (SMEs) in the tourism sector towards the transition to a circular economy, by fostering an integrated system at local/regional level.

CEnTOUR promotes innovative solutions for sustainable tourism development and management of tourism enterprises, through transnational cooperation and knowledge transfer, in particular towards SMEs focused on local supply chains and creating industrial symbiosis to develop circular business models.
