Concular

Poll 1: Digitization of materials

Let's assume registration of products and materials becomes standard. What benefits you most?

- Manage data
- Link to marketplace
- Official material passports
- Embodied carbon impact calculation
- Financial value calculation
- Report on (expected) material flows
- Other benefits

Poll 2: Recirculation of materials

**Let's assume digital marketplaces become popular for materials in the built environment.
What are the biggest benefits for you?**

- I can make money by selling materials.
- I can save CO2 emissions and do something good for the environment.
- I can find materials for my projects.
- I can improve the sustainable image of my company.
- Other benefits.
- I don't see any value in a marketplace.

Conclusion

Concular

Let's close the loop in the construction sector.

For the environment with closed
loops and resource efficiency.
