Webinar offers

2021/22
Implementation of individual and concerted measures
Impact measurement
Action guide

COMMUNICATION

BMEL Action Week
Explainer film

2021/22
Further action weeks and videos
2022
Publication of final report

Reflections

- Stakeholder engagement promising: High commitment; first own data collection by companies and numerous reduction measures already being implemented.
- Existing Challenges and To Do's:
 1. Increased attention to food use hierarchy necessary
> **Setting priorities**
 2. Not enough knowledge yet neither about the greatest levers nor sufficiently on the effects of measures > **More efforts needed to analyse and assess impact**
 3. Interfaces between retailers/wholesaler and suppliers, as well as between retailers/wholesaleers and costumers, require the joint development and implementation of solutions.
> **Jointly finding solutions**
