**Our commitment
to sustainable
packaging**

100%

LDPE

Anticipating the latest stringent
environmental policies with a
more efficient and cost effective
Packing solution.

ACTING RESPONSIBLY

Eceplast's vision is based on scrupulous attention to details, an eagerness to take on new challenges and comprehensive technological know-how. Eceplast affords its clients a conscious choice, while remaining both economically competitive and environmentally responsible.

Our commitment

Quality packaging **protects the environmental** and economic investment. We believe quality and sustainability are **inextricably linked!**

In our sustainable business strategy, Eceplast has identified **four areas of commitment**. We believe that by **integrating these areas** in our daily business agenda, we will improve our environmental, economic and social impact.

**WE PLEDGE TO
SUPPORT
THE EU PLASTICS
STRATEGY**

EU PLASTICS STRATEGY

European
Commission

Eceplast is proudly listed amongst the 70 companies who subscribed the EU voluntary pledge. [See the full list here](#)

- In December 2015, the Commission adopted an EU Action Plan for a circular economy. There, it identified plastics as a key priority and committed itself to 'prepare a strategy addressing the challenges posed by plastics throughout the value chain and taking into account their entire lifecycle'. In 2017, the Commission confirmed it would focus on plastics production and use and work towards the goal of ensuring **that all plastic packaging is recyclable by 2030.**

INCREASE RECYCLING

USE MORE RENEWABLES

**USE RECYCLED PLASTICS
WHEN PROVED SAFE**

**TARGET 10
Million Tons!**

Our contribution to the EU plastic strategy:

About Linerbags

ECE Liners are made of multi-layers co-extruded LDPE and LLDPE film to guarantee the maximum degree of safety and cleanliness for the transported bulk goods.

So far Linerbags are already by definition **the most environmental friendly packaging solution available on the market!**

Some data

Linerbags allow to safely pack and ship just in ONE bag Tons of bulk goods, optimizing volumes and reducing packaging, operational and shipping costs: I.E. **Shipping**

25T of plastic granules may requires:

1.000 25kg sacks -> approx. packaging weight used 150kg.

25 1ton FIBC -> approx. packaging weight 125kg

1 Linerbag -> weight 12kg only!

Good is not enough

Despite Linerbags are already the most efficient and environmental friendly packaging solutions, we are committed to improve and develop a better product.

As we achieved in the past a reduction of 20% of the average thickness and weight of the standard Liner, why not considering the possibility of

100%LDPE?

HOW IT WORKS

Made of a special LDPE film with higher puncture resistance and increased mechanical properties to guarantee the safest operational conditions. **All the liner components are made of LPDE.**

Easy to install as a standard liner. Improved and reinforced in every structural part.

100% recyclable and convertible into polymers for a circular production cycle with zero waste

100%
LDPE

MAIN BENEFITS

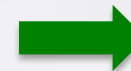

The Eceplast liner is really simple to recycle. You just need to:

Remove
(no tools needed)

Compact

**Collect and
recycle**

**PP WOVEN
FABRIC LINER**

HDPE LINER

**ECEPLAST
STANDARD LINER**

ECEPLAST
100%
LDPE

**A responsible way to
cut costs and time!**

THINKING IN A CIRCULAR WAY

A shared commitment!

Eceplast is able to build, together with its customers, the virtuous cycle of recycling. Stay on our side, support the environment.

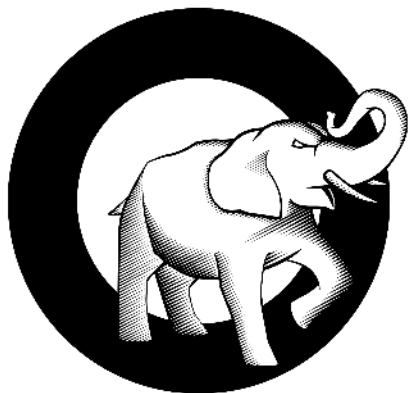

100% RECYCLED

We can offer an optimal solution which will brings sensible savings on cost of Liners and related operations while reducing the environmental impact of disposing an used liner.

**save your costs,
save the world**
