We will need many kinds of professionals also in the future - however, all of us will be circular economy specialists as well. We will have the understanding about limited natural resources and we know how to integrate circular economy solutions into our everyday decisions and routines.

We all have equal rights to be part of the transition towards carbon neutral circular economy.

Circular economy teaching materials

Are you looking for more effective tools for teaching about the circular economy in primary school, upper secondary school or vocational school? Here are some teaching materials that are appropriate for many different subjects.

Could you be the next circular economy guru in your workplace? If you have some extra time and are thinking about what to do, seize the opportunity and start studying! We have compiled courses to help you learn more about the circular economy from your own couch.

Thank you!
